14 May 1971

MEMORANDUM FOR: Director of Medical Services

SUBJECT : Drug Abuse Display

1. Attached for your information is a letter received subsequent to the presentation of the drug abuse display in

25X1A6d

2. During the time that the display has been shown in the various agency facilities, there has been expressed now and then the suggestion that the Office of Medical Services provide speakers for informal sessions to discuss drug abuse. The suggestions concerning this have been more frequent in recent weeks than previously.

3. It seems to us that agency employees are not using the Consultative Services to the degree that they might. This is disappointing, considering that one of the primary goals of the drug display was to advertise the help available in the Office of Medical Services. While large auditorium-sized groups preserve the anonymity which employees seem to need, it is a very poor way of presenting drug information which should be directed at the subjective need of the individual participant. The Consultative Services still seems to this office to be the optimal point of contact for concerned employees, and perhaps further encouragement in that direction would be worthwhile.

4. Operations Division has some ideas concerning this matter. Should you wish to discuss them, Dr. [REDACTED] is available at your convenience.
